

RESPONDER BADGE IDENTITY SYSTEM

BRAND GUIDE

VERSION 1.0 | JULY 2026

One mark. Two approved surface treatments.

Choose the version by background contrast - never by personal preference.

- **Full name stays attached**

Emergency Multitranslator is part of the approved lockup and must not be cropped away.

- **Minimum digital width**

Use the full lockup at 180 px or wider. Below that size, switch to the badge mark.

- **Use supplied files**

The letterforms, spacing, shield proportions, and internal artwork are fixed.

- **Clear space**

Maintain at least one-half of the capital E height around every side of the lockup.

Built for the full response community.

The central badge unifies EMS, fire, police, and field communication.

- FIRE**
Burgundy flame - urgency, courage, and fire service.
- EMS**
White pulse line - emergency medicine and continuity of care.
- POLICE**
Blue star - law enforcement and scene security.
- COMMUNICATION**
Radio and wireless signal - immediate multilingual connection.
- UNIFIED RESPONSE**
The lower green accent anchors all disciplines in one system.

Color and typography.

Use these values consistently across web, presentations, print, and video.

Responder Navy

#020D23

Operational Navy

#072044

EMT Burgundy

#A80F2A

Burgundy Shadow

#710018

Responder Blue

#0874F9

Signal Green

#7EBB2A

Montserrat ExtraBold

Supporting headlines - direct, operational, and highly legible.

Inter Regular / Semibold

Body copy, captions, interfaces, forms, and procurement materials.

IMPORTANT The logo wordmark is fixed artwork. Never retype or approximate it with a font.

Make the mark easy to recognize.

Consistency protects credibility across public-safety and government audiences.

DO

- **Use approved artwork**
Choose the dark or light file that provides the strongest contrast.
- **Protect clear space**
Keep copy, rules, photographs, and partner logos away from the lockup.
- **Use badge-only at small sizes**
The square badge remains readable when the descriptor cannot.
- **Keep service symbols intact**
Fire, EMS, police, and communication must remain together.

DO NOT

- **Do not stretch or rearrange**
Never change proportions, spacing, order, or orientation.
- **Do not recolor the badge**
Do not remove a service color or create department-specific versions.
- **Do not add effects**
No new outlines, drop shadows, glows, bevels, or background boxes.
- **Do not use superseded marks**
City shields, Star-of-Life concepts, and prior EMT919 logos are archived.

Start with the right file.

Every supplied PNG is sized and named for a specific production use.

01 PRIMARY LOGO

- Transparent dark-surface lockups
- 600, 1200, and 1800 px web files
- 3600 px master
- Navy-background presentation file
